

## Geriatric Care

El Camino Veterinary Hospital knows just how much your companions mean to you. From the moment you welcome them home and until the end, we are here for you. End of life care is one we never take lightly. When it is time for you to have that discussion we will always be ready to guide you. In Hospital or At-Home humane euthanasia are important options to know you have.

## Our Story

**ECVH** is a family-operated veterinary hospital in Atascadero, California owned by lead veterinarians Steven Robinson and Renee Leton. Together, they moved to the central coast and acquired ECVH, shaping it into a wide-reaching veterinary clinic that has served the central coast for over 25 years. Dr Robinson's and Leton's community involvement include providing vet care to the Charles Paddock Zoo and various local sports team coaching.

Currently, our practice supports 5 veterinarians who provide general practice care and 1 academically trained veterinary surgeon who provides specialty procedures and consultations for referral clients from all over the state. If you're wondering if ECVH is right for you and your pets please feel free to reach out and we will be glad to help point you in the right direction.

## Interested in Veterinary Medicine?

ECVH is a bustling place which harbors an environment for tons of experience and opportunities for hands-on training. We regularly look for young adults, students, and anyone else ready and willing to get their hands dirty and learn more about vet med. Kennel positions are a great start for anyone looking for exposure. We make use of veterinary assistants in everything from prescription filling to surgical prep and recovery. Giving injections, venipuncture, taking radiological imaging, ultrasounding, running in-house labwork and cytology are all skills useful in the vet field that are standard tools used at ECVH. If you've always wondered about a career please feel free to reach out!

Remember,  
have your  
pets spayed or  
neutered.
